What a pleasure it was to have you keynote our HFC National Convention. I knew you would be the home run I had been searching for. I had so many complimentary comments about your presentation and the insights everyone gained as a result. Your presentation was powerful, needed, required and well worth it a thousand times over. You made us laugh and cry all within a 5 min period. I was impressed with your pre-conference preparation and the time you obviously invested in understanding our organization and the unique characteristics of our needs. I consider you amazing presenter and a class act. I look forward to our continued relationship and look forward to using you in the future.

In my capacity as President of MAACO, I have coordinated hundreds of motivational meetings and literally have heard hundreds of speakers. Vince's message highlighting how the positive power vision and focus can have on one's success truly reflects what I have seen in real life. The beauty of his message and his story impressed me more for its down to earth quality than any I have heard in many years. His approach was really a breath of fresh air.
