

Scott Klososky A/V Requirements

The following is a list of room & a/v preferences. Please know these are flexible if there are extenuating circumstances.

Staging

Scott will use his laptop from the stage so a podium or table is needed as well as a stable Internet Connection.

Microphone

Wireless lavalier microphone

Screen & Computer Projection System

Scott will use his own Apple MacBook Pro laptop because he often has music and video files that would not be easy to move to another computer.

Media/PowerPoint/Materials

Scott's slides are formatted in 16x9. He uses Apple Keynote to create his media presentation and often works on it up until the last minute because of the way he often customizes them for the audience. For these reasons, he is not able to send his slides in advance.

Recording

We encourage video recording for archival purpose. A separate agreement will be required and a licensing fee may apply depending on how you plan to use the recording after the event. If you plan to record any portion of Scott's presentation please call or contact our office to request a Recording Agreement.
