

BILLY ANDERSON A/V REQUIREMENTS

- Countryman microphone. I move around a lot up there and nothing else maintains the sound better.
- 1 hand-held wireless microphone for the stage
- 1 standing microphone (can be the podium mic) for my song.
Vocals and acoustic guitar share the one standing mic, no separate guitar mic or plug-in/amp needed.
- Podium on one side of the stage (away from center-stage)
- Countdown clock (if possible) in front of me, ideally on the floor in front of the stage
- My presentation: I will provide my PowerPoint presentation on a memory stick the day before the keynote. Note: there is no audio or video within my presentation.
- Presentation remote for forwarding my slides (I will bring a back-up)
