

ROD BRISTOL A/V ROOM SETUP & REQUIREMENTS

The AV set up should include a screen, projector, sound system, lavalier microphone for Rod, a podium on the stage for his laptop and connections to both the projector and sound system along with power at the podium.

Rod will run his slides himself from the podium.

Rod presents programs that encourage audience participation. The ideal set up is round tables with the audience sitting around one half of the table with no one's back to the stage/screen.
